

Technical Rider – 2020

The show can be performed on most spaces or at any events and will be adjusted to the surroundings to make sure nobody will be disturbed and to have the optimal performance results for the visitor and organizers.

We always communicate with other acts, sellers of goods and food stalls close by to make sure the show will have the best possible experience for everyone.

We make sure to keep all fire and walkways free so anyone can pass at any given moment!

If possible send some photos of the suggested spaces to info@bubblesforfun.com

Please contact us personally by phone to agree on the ideal space for the show.

See you soon!

STAGE:

- 1) Location stage: crowded walkway with lots of people passing in proximity from the main event.
- 2) Keep 2 options opposite from each other free for the stage as it will be setup with the wind in the back and might change location relative to the dominant wind direction.
- 3) Preferred underground is asphalt or stone but can also be on grass or gravel. We provide a kids pool to capture most of the spilled soap and make sure the stage is slip free after the performance
- 4) If possible close to trees or buildings to have shade and cover from strong winds and sun.
- 5) For stage performances we provide a floor mat to catch most of the soap.
- 6) We provide and apply a small amount of sand on slippery surfaces to avoid people from slipping.

PRACTICALITIES:

- 7) A car park for a small van (VW T5) must be provided close to the event. If the distance is further then 1000m the event has to provide transport in between the car park and the place of performance.
- 8) 3 free entrance tickets with backstage access for the artist, photographer and possibly one assistant.
- 9) Arrival will be about 1 hour before the performance.
- 10) Provide contact of the event manager for meet and greet.

EXCLUSIVITY:

- 11) Bubbles For Fun exclusivity for bubble acts on the event is a must to maximize the surprise effect of the shows!

Thanks for choosing Bubbles For Fun!
